Office Action Summary	Application No. 10/763,699	Applicant(s) WILCHER, STEPHEN B.	
	Examiner Christopher Upton	Art Unit 1724	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

HR

1. Claims 4-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, "moves linearly" is functional language and should be expressed in structural or means-plus-function form. In claim 5, the "end member" is unclear, as it is identified as being the hook end in claim 3, but the slot appears to be in the opposite end from the hook.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 and 10-13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bleyer.

Bleyer discloses a filter screen with screen panels coupled to drive chains having means to fix the panels relative to the links and to pivot the screens for access

comprising bushings (28) and hooks (31), as claimed. With respect to the recitation of end to end seal plates overlapping the joints between the links, it appears that the end plates (22) and flanges (27, 31, 30) obviously form such seal plates.

4. Claims 4-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The recitation of a filter grid assembly having a drive chain with multiple guide links joined in end-to-end relation and with multiple end-to-end seal plates overlapping the guide link joints and a screen coupled to a link for movement between a fixed position for filtering and a pivotal position for maintenance, wherein the guide link has a bushing and the screen panel has an end with a hook for engaging the bushing and moves linearly relative to the guide to disengage the hook patentably distinguishes over the prior art of record.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references of interest include Wetzel and Hughes.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Upton whose telephone number is 571-272-1169. The examiner can normally be reached on 7:30-5:00, off every other Monday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
